

## Some Common Situations

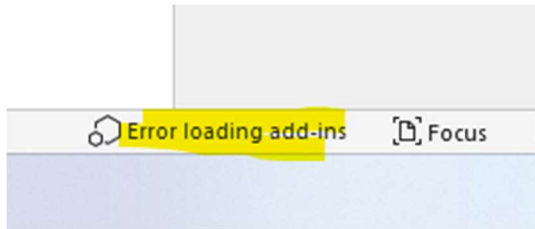

Picture #1: Normal Math type Interface

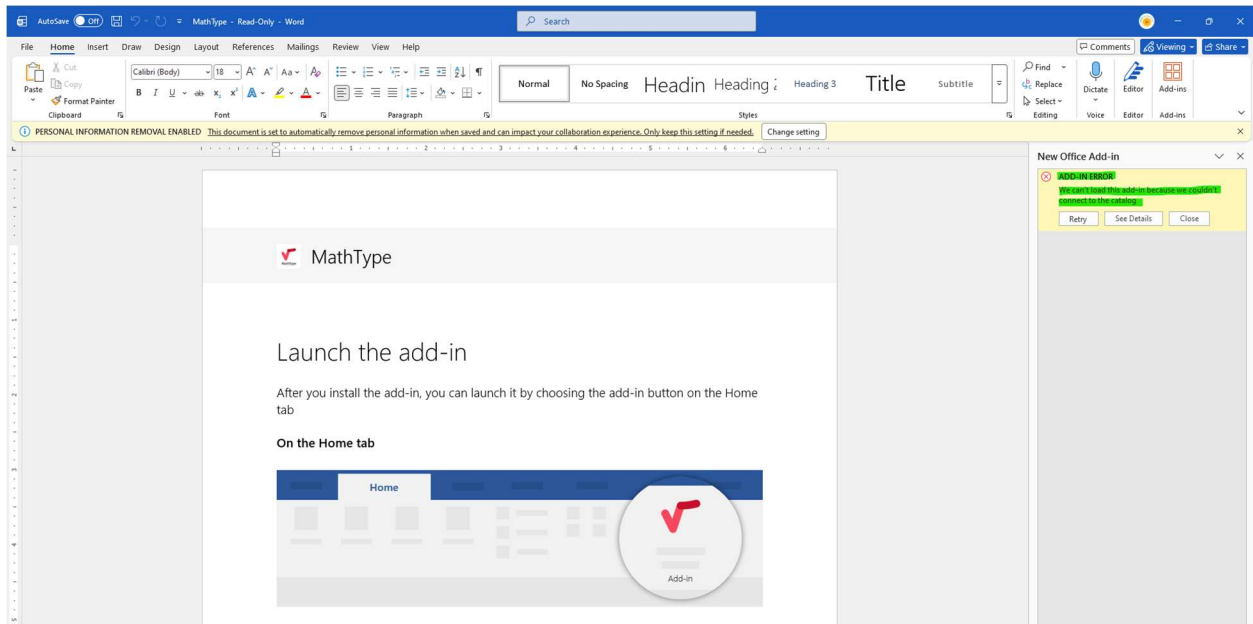

Picture #2: Latest Version of Math Type

Picture #3: While trying to add-in

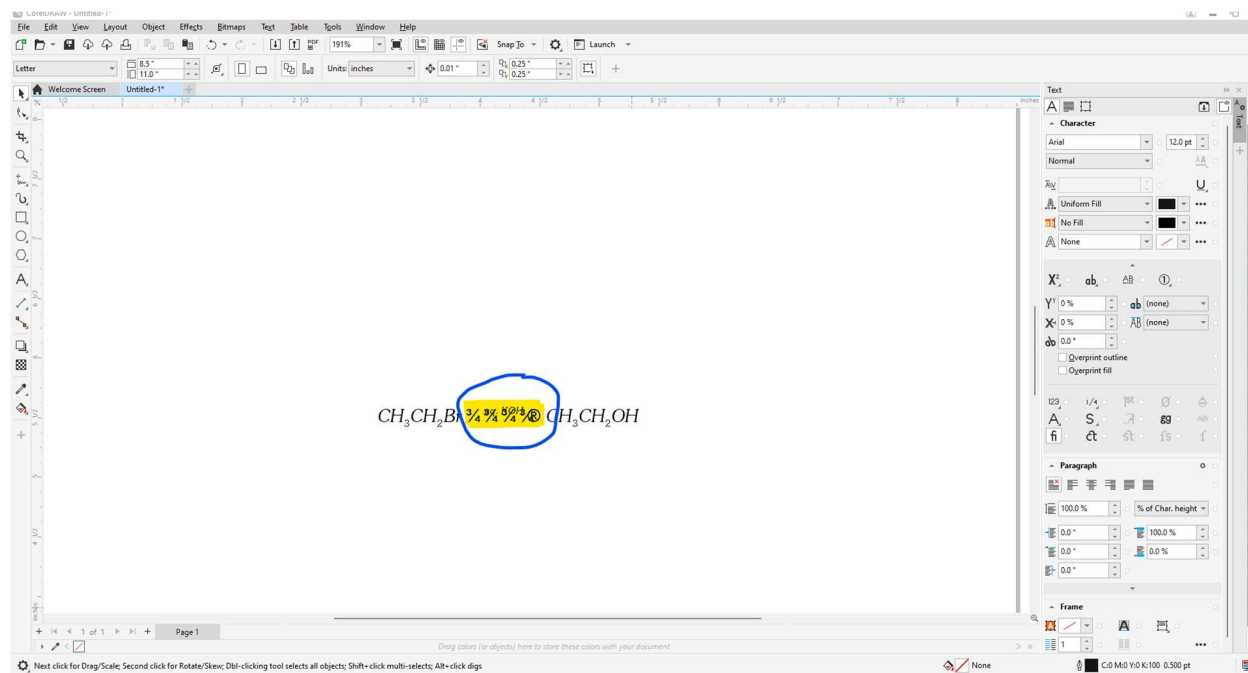

Picture #4: Error while trying to install Add-In through portal

### Picture #5: While trying to import chemical equations from Math Type to Corel Draw

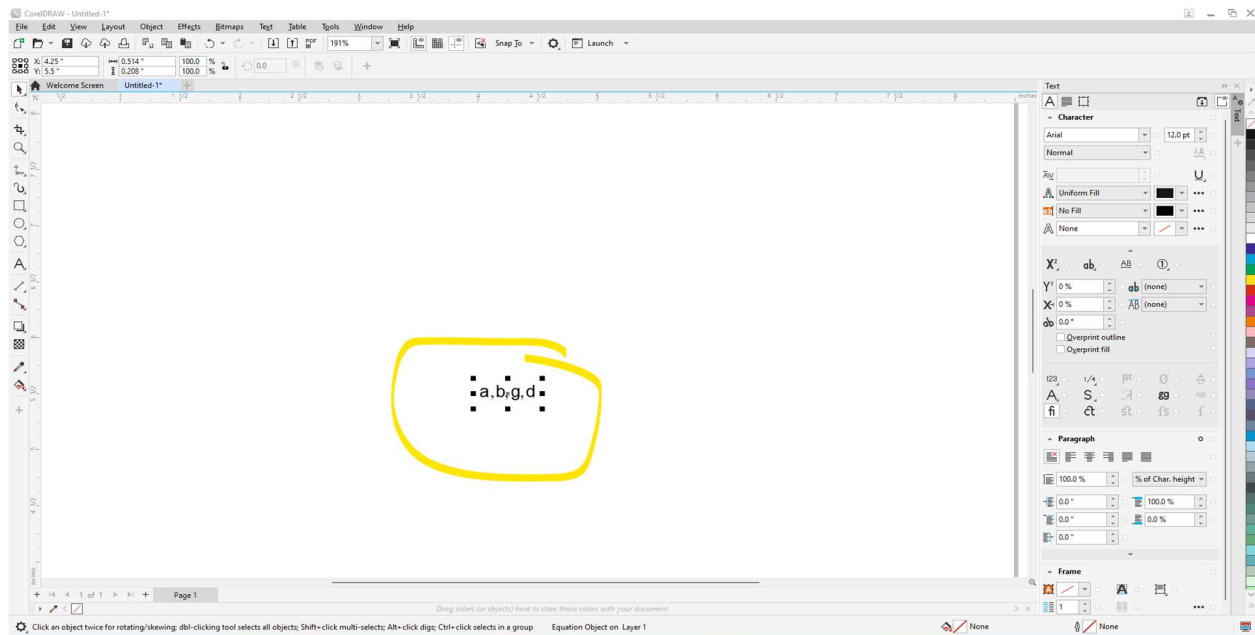

$CH_3CH_2Br \xrightarrow{aq. KOH} CH_3CH_2OH$  (From Mathtype Interface and below from Corel Draw Interface)

Although, Two years ago, there was no such error occurred in Corel Draw while doing copy-paste from Math Type to Corel Draw.

## Picture #6: Normal Greek symbols during copy-paste from Math type to Corel Draw

$\alpha, \beta, \gamma, \delta$

## Picture #7: Normal algebraic expressions works pretty good in Corel Draw during copy-paste.

$$x = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a}$$
